Re: RCRA Deferrals

Dear Ms. Vega:

The IEPA Site Assessment Unit has reviewed the list of CERCLIS sites that are scheduled to be deferred to the RCRA program. Below is a list of some of the sites that we feel should not be deferred to RCRA at this time.

Borg Warner Corp.

ILD 079 152 518

This site is not listed as a RCRA TSD or Generator. The presence of this site on CERCLIS has prompted the owners to begin negotiations with the IEPA "voluntary program".

For more information contact Mark Wagner at 217-524-5224.

Bordner Manufacturing

ILD 981 907 451

The IEPA is in the process of completing an Integrated Assessment of this site. The site operated from 1956 to 1991, and is listed as a RCRA very small quantity generator; conditionally exempt. The facility was not permitted. A removal action began at the site, removing contaminated soil, but groundwater table fluctuations caused the removal activities to stop.

For more information contact Ted Prescott at 217-524-3511.

Precision National

ILD 047 731 112

(You and Sheri Adams have already discussed this site.) Precision national was sampled in 1994 as part of an Integrated Assessment conducted on the former Mt. Vernon Car Manufacturing Co. At that time the Precision National Corporation was to be undergoing RCRA closure of several units. However, it is now evident that this not going to happen, due to financial difficulties. Therefore, due to the contaminants detected during the IA and the failure to close the RCRA units, this site should remain active on CERCLIS. Currently the state is pursuing enforcement and a possible state cleanup of Precision National. It would be beneficial to keep this site on CERCLIS until some state decision is made regarding this site.

For more information contact Sheri Adams at 217-524-1659.

Because of field work, some of our people have not yet had the opportunity to review the list. I will forward any additional information as soon as possible. Thank you for your time and consideration. If you have any questions or concerns please contact us.

Sincerely,

Judy J. Triller
